Professional Summary

Computer Science undergraduate (2027) with hands-on experience in Core Java, web development, and data analytics through internships, and a track record of building interactive web apps (HTML, CSS, JavaScript) grounded in OOP, DSA, and core CS fundamentals.

Experience

Core Java Intern (Virtual) — upSkill Campus

Jun 2026 (4–6 weeks)

In collaboration with UniConverge Technologies

- Applied Core Java and OOP concepts to develop a console-based Expense Tracker, implementing expense recording and management using object-oriented design.

Data Analytics Intern — Dreamvessels Technology Pvt. Ltd.

Sep 2 – Sep 30, 2024

Integrated Campus Internship

- Used Advanced Excel and Power BI for data analysis, dashboard creation, and business reporting.
- Built and maintained interactive dashboards to present business data and support data-driven decision-making.

Projects

Intervia — AI Mock Interview Platform | [Live Preview](#) | [Source Code](#)

HTML, CSS, JavaScript, Gemini API

- Solo-built a browser-based AI mock interview platform, using the Gemini API to generate topic- and difficulty-based questions instead of a static question bank.
- Delivered automated answer evaluation and scoring across **5+** question categories, giving users structured feedback without a human interviewer; deployed live via GitHub Pages.

FinTrack — Personal Finance Manager | [Live Preview](#) | [Source Code](#)

HTML, CSS, JavaScript, Chart.js

- Designed and built a responsive finance dashboard end-to-end, choosing Local Storage over a backend to keep the app fully client-side and usable with no signup.
- Implemented category-wise expense tracking with Chart.js visualizations across multiple chart types, letting users see spending breakdowns without manual spreadsheet work.

Simon Says — Browser Memory Game | [Live Preview](#) | [Source Code](#)

HTML, CSS, JavaScript

- Solo-built a browser memory game, implementing a progressive-difficulty algorithm to scale sequence length with player performance.
- Added score tracking and a locally-stored best-streak leaderboard, supporting **10+** replayable rounds per session.

Skills

Languages: Java, JavaScript

Familiar: C, Python, SQL

Web: HTML, CSS, Bootstrap

CS Fundamentals: OOP, Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks

Tools: Git, GitHub, VS Code

Data & BI: Advanced Excel, Power BI

Soft Skills: Communication, Teamwork, Problem-Solving, Adaptability

Education

I.E.C. College of Engineering & Technology

2023 – 2027 (Expected)

B.Tech, Computer Science & Engineering | CGPA: 7.93/10 (through 6th semester)

Certifications

- Generative AI Essentials — TCS iON, 2026.
- AI and Cybersecurity Awareness — TCS iON, 2026.

Achievements

- Awarded a Rs. **20,000** merit scholarship during the first year of B.Tech.
- Participated in **Game of Code 2K25**, a college-level coding competition.
- Practicing **Data Structures & Algorithms in Java** on LeetCode.
